Request for Quote #1210-013 Water Slide Preventative Maintenance/Inspection For the City of Frisco

Quotes due to dford@friscotexas.gov no later than Tuesday, November 29th, 5:00PM CST

The City of Frisco would like to extend the opportunity for your company to bid on providing water slide preventative maintenance/inspection services for water slides at the Frisco Athletic Center. This is being quoted as a 1 year agreement with 4 annual renewals.

The slides being quoted include one indoor body slide (approximately 2,580 square feet), and 3 outdoor slides-outdoor green squirt station body slide (approximately 754 square feet), outdoor green gusher (approximately 1,850 square feet), and the outdoor pipeline slide (approximately xxx square feet). The City intends to have inspections on the indoor slide twice per year, and the outdoor slides once per year.

The following services will be required for each slide;

1. Cleaning of slides to remove dirt, grime, calcification, etc.-This process should include pressure washing and an acidic cleaner compatible with water slide cleaning. The slides should be cleaned and rinsed to the point that they are ready to be polished.
2. All slide footers should be inspected to determine if there are any cracks in the cement or other structural damage. A service quotation should be provided for any footer that is in need of structural repair.
3. Joints should be inspected for wear and degraded joint caulking. Where needed, joints should be repaired with joint caulking recommended by the water slide manufacturer. Uneven and sharp/rough edge seams should be repaired as well.
4. Apply one coat of carnauba wax and use a high speed buffer on the interior riding path and entry tub.
5. Inspect and provide a service quote to repair metal support structures, hardware, bolts, tower platforms, stairs treads, and hand rails that are not structurally sound.
6. Inspect and provide a service quote to repair slide decks, walkways and stairs. This includes sharp/rough edges, wood splinters, protruding nails, proper placement, structural strength, cracks, uneven surfaces, obstructions, rust stains, corrosion, slippery conditions and other hazards.
7. Power wash/clean stairways to the indoor slide and the 2 outdoor slides with stairways.

Please provide pricing on the following options:

Item 1: Comprehensive Inspection report (to include at a minimum all inspections listed above), slide cleaning, and waxing:

Indoor Slide_____ (2580 sq ft)

Outdoor Green Squirt Station Slide_____ (754 sq ft)

Outdoor Green Gusher_____ (1850 sq ft)

Outdoor Pipeline_____ (xxx sq ft)

*****Item 1 should be priced as a lump sum amount per complete inspection. If a discount is given for an additional year agreement up to years 2, 3, 4 or 5 of the agreement, please note that as well.
